Phoenix
by Voice Solutions

What is Phoenix

The latest version of Voice Solutions, Phoenix is a digital solution for recording, managing, and transcribing dictation. It acts as your digital dictation hub and can run on a dedicated or virtual server.

Phoenix brings all of the features you have come to expect from a digital solution but with a very streamlined and user-friendly approach. End-users and admins alike will find it easy to learn while providing a highly customized and versatile experience. In addition, your data is always secure with encryption, profile permissions, and backup options.

Key Features

Dictate Your Way
Dictate from your computer, cellphone, digital recorder, dictate station, or any telephone

Internet Transcription
Using iNet 3, users can type anywhere, including home, over the internet or a VPN

Upload Via Internet
Upload dictation while traveling using our client app or through any web browser

Powerful Management Tools
Easily group edit dictations, assign work, export, create custom reports, and more

Secure Your Data
Access logs, profile restrictions, encryption, and more to meet today's security policies

Intuitive Admin Console
Even administrative tasks such as editing user profiles and system settings are easy

Designed For Reliability
Compatible with virtual servers, built on the Apache web server, and uses MySQL

Most Affordable Server Solution
Big on features, big on ease of use, but low on price - no other brand comes close

Versatile Solution

PcDictate & Digital Portables

PcDictate is a software app for PC dictation. Digital portables offer reliable, mobile dictation. Some benefits are:

- Variety of USB mics supported
- Barcode accessories available
- Visual icons make dictation easy
- Dictate while on the move

Telephony Dictate Stations

Stations can add great features to telephone dictation. For example:

- Slide-switch mics
- Barcode scanners
- Hands-free input with foot control
- Conference or interview mic add-ons

Internet & Telephone Transcription

Transcription can be done with a telephony station or now with iNet, a network/internet application. Some of iNet's benefits are:
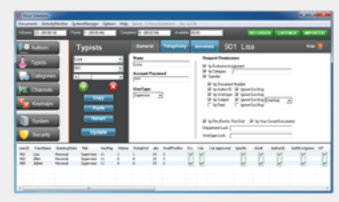

- See all available dictation
- Easy search and report tools
- Administrative routing & editing

Easy Management Tools

Whether a computer expert or novice, basic system administration is a breeze. With a few clicks you can:

- Create, edit, and delete user profiles
- Create and edit custom dictation filters
- Export dictation, adjust security levels & more!

Trusted Solution

Phoenix is trusted by organizations around the country. Some of these markets include:

- Hospitals & Medical Offices
- Law Firms
- Government Agencies
- Transcription Companies
